PROFESSIONAL SUMMARY

Backend Developer with hands-on experience in REST API development, HRIS systems, database-driven applications, and automation scripting. Skilled in Golang, Go Fiber, Python, PostgreSQL, and MySQL. Experienced in building backend services, debugging application issues, and supporting software delivery for business operations.

TECHNICAL SKILLS

Backend: Golang, Go Fiber, Node.js, REST API

Database: PostgreSQL, MySQL, CRUD

Programming: Golang, Python, Java, JavaScript

DevOps & Tools: GitHub, GitLab, GitHub Actions, NetBeans

Automation: Python Scripting, Web Crawling

Frontend: React.js, Tailwind CSS

Additional Exposure: NodeMCU, RFID, Draw.io, Notion

WORK EXPERIENCE

Backend Developer

Sep 2024 – Present

Selantara Kreasi Nusantara

- Develop and maintain backend services for an HRIS Management System using Golang, Python, and PostgreSQL.
- Build RESTful APIs to support employee data management, HR operations, and internal business workflows.
- Create automation crawling scripts to collect and process social media data for internal needs.
- Collaborate with team members to test, debug, and improve backend features before deployment.

Software Developer Intern / Project Developer

Apr 2024 – Jul 2024

Sepatudepok.id

- Developed a Stock Management Application using Java, MySQL, and NetBeans.
- Built application features to support inventory tracking and stock data management.
- Conducted UI/UX quality assurance testing to identify usability issues and improve user flow.
- Tested application functionality to ensure data input, stock updates, and user interactions worked correctly.
- Supported application debugging and refinement during the development process.

SELECTED PROJECTS

HRIS Management System | Tech Stack: Golang, Python, PostgreSQL

Backend system for managing HR-related data and internal operations. Developed REST APIs, backend logic, and database integration.

Social Media Crawling Automation Script | Tech Stack: Python

Automation script for collecting and processing social media data to support internal analysis workflows.

Stock Management Application | Tech Stack: Java, MySQL, NetBeans

Inventory management application for product stock tracking, data updates, and stock monitoring.

EDUCATION

Bachelor of Informatics Engineering

2020 – 2024

Universitas Indraprasta PGRI

Vocational High School, Multimedia

2017 – 2020

SMKS Putra Bangsa

ORGANIZATION

Member

2024 – 2026

Forum Pemuda RW 01 Mekarjaya
